John James Peregoy

Biography

John James (Jim) Peregoy graduated from Colorado School of Mines in 1976 w/ degrees in Engineering, Mining, and Mathematics and has spent 39 of the past 45 years in the Heavy Construction marketplace.

His first assignment was as a field engineer on a hiway project in the mountains of Colorado and New Mexico during the summer of 1976. Since then, he has broadened his knowledge base to include raises, shafts, slopes, tunnels, chambers, and various other underground works.

On the field side, he advanced from equipment operation thru engineering, to managing projects. On the administrative side, he has worked thru successively higher positions at the home office level, to leading corporate operating divisions for tunneling and general underground contractors.

He has been involved w/ more than 230 projects through-out the United States and Canada w/ additional projects in Mexico. Thru his company, Peregoy Construction Services, Inc., he has been involved w/ another 110 such projects.

His background includes selection of appropriate means and methods, project and risk analysis, specification and document review, cost estimating, bidding, on-going cost control, and engineer representation in contractual matters.

In 2008 he formed his company to provide his broad and comprehensive experience, and expertise, to other contractors, as well as engineers, owners, lawyers, and government entities.
